Kiran Zahid

AI Automation Developer · Software QA · Robotics Learner

Punjab, Pakistan | kiranzahid188@gmail.com | WhatsApp: +92 318 7977782
Portfolio | LinkedIn | GitHub | Fiverr | Upwork

Professional summary

Emerging technology professional focused on practical AI workflow automation using n8n, OpenAI, Gmail, and Google Sheets, with documented manual software testing experience and ongoing robotics coursework through Northwestern University.

Core skills

- AI automation and workflow automation (n8n, Zapier)
- AI tools and large language models (LLMs)
- Robotics and automation
- Manual functional testing: test-case execution, comparing expected and actual results, documenting outcomes

Projects

AI Lead Qualification & CRM Automation

Designed and configured an n8n workflow that normalizes web-form leads, assigns Hot/Warm/Cold priority with OpenAI, records leads in Google Sheets, sends acknowledgements, and routes priority notifications. Result: a repeatable lead-triage process with central records and priority-based notifications.

AI Customer Support Email Agent

Designed and configured an n8n workflow for Gmail inquiry intake, validation, AI-assisted responses, human-review routing, eligible automated replies, and Google Sheets logging. Result: a structured support workflow with a record of handled inquiries.

AQSA POS System Testing

Manual functional testing of a point-of-sale application across key workflows. Executed and documented 100 test cases, compared expected and actual results, and recorded outcomes and limitations. Supporting test evidence is available in the portfolio.

CKD Screening AI (in progress)

Demo exploring AI support for chronic kidney disease screening and early risk assessment. A demonstration project, not a diagnostic tool.

Fire Chaser Extinguisher Robot (in progress)

Robotics project built around a fire-detection and fire-response concept.

Experience

Teacher, The Educators — April 2025 – October 2025

- Developed professional communication, responsibility, organization, and classroom-management skills.
- Worked directly with students in a structured and professional learning environment.

Senior Teacher (Classes 9–10), Science Valley — October 2025 – September 2026

- Taught students in Classes 9 and 10, developing strong communication, classroom management, organization, and time-management skills.
- Planned and delivered lessons, supported student learning, and handled day-to-day teaching responsibilities.

Intern, AQSA IT Solutions — October 2026 – Present

- Internship connected to practical IT work and software quality.

Education

Intermediate (ICS – Physics) — Completed 2025

Pakistan Girls College Dina

Courses and training

- Modern Robotics Specialization, Northwestern University (currently pursuing)
- AI Mastery, AQSA IT Solutions — Completed 21 September 2026
- Elements of AI, University of Helsinki — Completed 25 August 2026
- AI Elements, Riphah University — Completed 10 August 2026

Languages

English (fluent), Urdu (native), French (basic)

Availability

Part-time, night shifts, and weekends.
